

*Train for Success at the flying field.*

**A-RFL1211 / A-RFL1212** RealFlight Trainer Edition with SLT6 Radio / WS2000 Dongle

RealFlight is the #1 RC flight simulator in the world! It's also the absolute best tool new RC pilots can use when learning how to fly. With 8 different trainer aircraft - including 2 helicopters from Blade and 6 of the most popular airplanes from HobbyZone® and E-flite - plus Virtual Flight Instructor lessons perfect for first-time pilots, RealFlight Trainer Edition has everything you need to succeed in learning to fly RC because you can practice "flying" on a computer before you fly your model at the field! This version also includes additional features including nearly two dozen "Next Step After a Trainer" aircraft and variants plus 4 flying sites/fields that are unlockable reward content after you fly the trainer models for just 2-4 hours. Other added features include a fresh and modern user interface that's even easier and more intuitive to use, multiplayer options so you can train and fly with others online, the option to turn on wind, unlock float flying, and more!

**A-RFL1211 - SLT6 Transmitter**

Available with a Spektrum SLT6 transmitter that can also be used to fly ultra-micro/UMX (Ultra Micro eXtreme) aircraft equipped with receivers featuring Spektrum SLT FHSS technology!

- Compatible with UMX aircraft featuring SLT FHSS equipped receivers
- 6-Channel transmitter with one 3-position switch, two 2-position switches, and one momentary button
- Prevents wear and tear on your field transmitter

**A-RFL1212 - WS2000 Dongle**

Wirelessly connect your Spektrum DSMX / DSM2 radio to your computer, Android tablet or Android mobile device and play games or use with compatible R/C simulators. No additional hardware or software is required. Simply plug the dongle into the USB port of your computer, or micro USB port of your Android tablet or mobile device and you are ready to go.

**Minimum Recommended System and Other Requirements:**

- Desktop or laptop PC With:
- Intel or AMD processor
- Windows 10 or 11
- DirectX 11 capability
- 4 GB RAM
- 1.5 GB hard drive space (10 GB when upgrading to a "full edition")
- Internet connection to download the Steam Client and the RealFlight Trainer Edition software

**Optimal System (for the best graphical performance):**

- 8 GB RAM
- 3D Accelerated Video with 512 MB dedicated video memor

**FEATURES**

- The perfect tool new RC pilots can use to learn to fly successfully in less time and with fewer crashes of their "real" models
- Industry-leading True-To-Life™ physics that make every flight more lifelike than any other sim
- A fresh and modern user interface that's even easier and more intuitive to use, virtually eliminating the need to use a mouse or keyboard with the optional InterLink DX controller
- Fly 6 of the most popular trainer airplanes from HobbyZone and E-flite, and 2 helicopters from Blade
- Unlockable reward content including nearly two dozen "Next Step" aircraft and variants plus 4 flying sites/fields after flying the trainer aircraft for 2-4 hours
- Virtual Flight Instructor lessons perfect for new pilots learning to fly
- Easy to download, install, and update via Steam – even on multiple PCs
- Available with a Spektrum SLT6 transmitter/controller or a WS2000 Dongle

**IN THE BOX**

**Both Versions**

- (1) RealFlight Trainer Edition Card with Activation/Installation Instructions and Steam Key

**A-RFL1211 Version Only**

- (1) Spektrum SLT6 6-Channel Radio
- (1) USB-C to USB Cable

**A-RFL1212 Version Only**

- (1) Spektrum WS2000 Wireless Simulator USB Dongle

**NEEDED TO COMPLETE**

**Both Versions**

- Compatible PC desktop or laptop with Windows 10 or Windows 11
- Internet connection to download the Steam Client and RealFlight Trainer Edition software

**A-RFL1212 Version Only**

- 6+ channel Spektrum DSMX/DSM2 equipped 2.4GHz transmitter
