

NX8+ GET MORE WITH PLUS

P-SPMR8210EU NX8+ 20-Channel DSMX Transmitter Only

With the Spektrum™ NX+ series, you'll enjoy the versatility needed to operate your models to their fullest potential and to fly complex aircraft like EDFs and giant-scale balsa airplanes. That's just where the next generation NX8+ advantage begins. The NX8+ also incorporates many of the latest exclusive Spektrum™ innovations for a level of ease, efficiency, and performance that discriminating pilots demand.

Out of the box, the NX8+ is compatible with Smart Technology. It comes ready to support your Spektrum Smart batteries and Smart Avian ESCs so you can receive essential telemetry data at your fingertips in real time. The NX8+ radio's Wi-Fi connectivity adds even more convenience. In addition to completing product registration straight from the transmitter, you can download firmware updates instantly. Additionally, the transmitter features AS3X+ forward programming, and the latest innovative Smart Transmitter File Download from the receiver. It's a modern user experience.

More proven Spektrum radio expertise can be found in the NX8+ transmitter's ergonomic design. The contours, balance, and control positions combine to increase the accuracy of your inputs and provide unparalleled comfort. An easy-to-use roller wheel interface and easy-to-read menus simplify programming. The large 3.2" colour display also presents telemetry information in crisp, clear, high-resolution detail and lets you choose from multiple colour palettes - or create your own. A long-lasting, rechargeable 1S 2200mAh Li-Ion transmitter battery and USB cable for convenient USB charging are included.

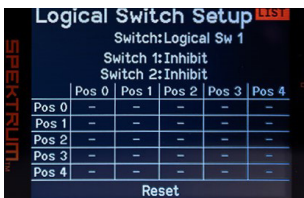

FEATURES

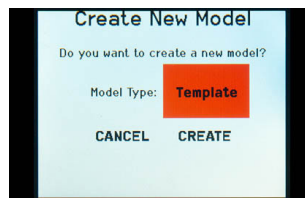

- 20 channels
- AS3X+ Forward Programming
