

TAME THE TRAILS WITH A TRUE CLASSIC

C-AXI00001V2T3/T4 1/24 SCX24 1967 Chevrolet C10 4WD Truck RTR Orange/Black

Introduced by GM in 1967 as a multi-purpose workhorse, the full-size Chevrolet C10 pickup holds its own on the trails even today. It refuses to show its age or diminish in popularity. As one of the best-selling Axial micro rock crawlers of all time, the 1/24 scale SCX24 1967 Chevrolet C10 not only recreates the 1:1 original's classic styling but also delivers exceptional value in an RC rig - value that's better than ever in this updated version. The SCX24 Chevy C10 has all the performance capabilities of the proven Axial SCX24 platform. Full-time 4WD and a 3-link front/4-link rear suspension let you muscle over big challenges. Worm gears on the axles increase the ground clearance. Realistic steel C-channel frame rails stand up to hard knocks. The detailed scale body rides on licensed 1:1 Method wheels and BF Goodrich tyres that tackle on-road and off-road challenges with ease.

Inside the box, in addition to the assembled and finished rig, you'll find a Spektrum SLT2 2.4GHz transmitter, 350mAh LiPo battery, and handy USB charger. Four AA batteries are also included for the transmitter. Unleash big crawling adventures with the updated Axial SCX24 1967 Chevrolet C10!
