

A-EFL07750 / A-EFL07775 Viper 64mm EDF BNF Basic / PNP Sports Jet

The E-flite Viper 64mm EDF is scaled down from the extremely popular 70mm and 90mm models to deliver a jet flying experience unlike any other model in its class. And like the full-scale ViperJet, it sports fighter-jet looks with the stability of a low-wing sport airplane so more pilots can enjoy flying a jet - even if it's your first-ever EDF! It delivers excellent speed, vertical performance, and aerobatic capability while also being easier to hand launch or take off and land than other similar class models - especially the Bind-N-Fly Basic version that's equipped with exclusive AS3X+ and SAFE Select technologies. And both versions feature a Spektrum Avian 70A Smart Lite ESC paired with a high-power outrunner motor and 11-blade 64mm fan to deliver amazing performance with 4S 2200-3200mAh batteries!

FEATURES

- A scale jet model with incredibly smooth sport airplane handling and amazing aerobatic capability
- Expertly engineered and optimized ducting for incredibly efficient performance without "cheater" holes
- 11-blade 64mm fan delivers excellent top speed and vertical performance plus a turbine-like sound
- Factory-installed 4S-compatible 2840-3150Kv brushless outrunner motor plus 70A ESC
- Extremely wide performance envelope and speed range, including class-leading top speeds
- No tools required to remove the landing gear for improved speed and vertical performance when flying over grass
- Factory-installed flaps for shorter takeoffs and landings plus improved slow-flight performance
- One-piece wing with hands-free servo connections for easy installation/removal
- Seven fast and precise digital servos with ball-link equipped linkages
- Large and convenient top hatch with clear canopy, cockpit detail, and pilot
- Lightweight yet strong and durable composite-reinforced EPO construction
- Magnetically-secured and easily removable/replaceable nose cone

IN THE BOX

- (1) Viper 64mm EDF with:
- (7) Spektrum Digital Servos
- (1) Spektrum BL Outrunner Motor
- (1) Avian 70-Amp Smart Lite BL ESC
- (1) AR631+ 6-Channel Receiver with AS3X+ and SAFE Select (BNF Only)
- (1) Product Manual

NEEDED TO COMPLETE

- **BNF Basic** - Full-range 5-7+ channel Spektrum DSMX transmitter
- **PNP** - Full-range 5+ channel transmitter and receiver
- (1) 4S 2200mAh 50+C to 3200mAh 30+C LiPo with EC3 or IC3 Connector
- (1) Compatible LiPo charger
