

THE BEST MICRO IS BACK!

MICRO-B

C-LOS00007T1/T2 1/24 Micro-B 2WD Buggy RTR White / Silver

Small enough to run almost anywhere, the 1/24 scale Losi Micro-B 2WD RTR is an easy, budget-friendly way to share your passion for racing with friends and family. Inspired by a TLR World Champion buggy, it's proof that a micro buggy can deliver big fun!

Longer run times are great. Higher speeds are even better, and the 13+ mph top speed capability of the Losi Micro-B might seem absolutely insane for a buggy of this size. If you're not sure you're ready to handle it, however, think again.

The Losi Micro-B lets everyone enjoy the fun and challenges of RC racing without requiring lots of time, money, and space. In fact, at this price, you can own more than one — and be ready to go racing with your friends and family anytime and anywhere!
