

THE BIGGEST VALUE IN MICRO CRAWLERS

C-AXI-1219T1/T2/T3 1/24 SCX24 Base Camp RTR White / Blue / Pink

For experienced drivers, it's a proven platform at a low cost that can be upgraded into the micro rig of your dreams.

Full-time 4WD and a 3-link front/4-link rear suspension let you confidently muscle this micro crawler over rough, risk-filled trails. Worm gears on the axles increase the ground clearance. Realistic steel frame rails on the C-channel chassis stand up to hard knocks. The proven SCX24 suspension tackles bumps, rocks, and stays stable over tough terrain. Topping it all off is a durable, factory-finished body with contemporary truck styling.

One of the most successful micro platforms of all time, the Axial SCX24 is also one of the best values in the RC crawling hobby. Inside the box, along with the assembled and finished rig, you'll find a Spektrum SLT2 2.4GHz transmitter, 350mAh LiPo battery, and handy USB charger. Even the AA transmitter batteries are included. For big adventures in micro RC crawling - at a small price - come to the SCX24 Base Camp!
