

C-AXI-1750T1/T2 1/18 UTB18 Capra 4WS 4WD Trail Buggy RTR Blue / Yellow

The Axial UTB18 Capra 4WS Unlimited Trail Buggy climbs to the summit of the mini RC crawler category with the best features for crawling on challenging indoor and outdoor trails. It's also fully ready-to-run, and at 1/18 scale, very affordable. Whether you're a veteran RC crawling enthusiast or a new modeler bringing home your first RC rig, the UTB18 Capra 4WS makes it easy to add adventure to your life almost anywhere.

Four-wheel steering gives the UTB18 Capra 4WS impressive maneuverability, whether you're climbing rock ledges, flexing over obstacles, or squeezing through tight notches. Portal axles with Currie F9 housings provide the high clearance to navigate those rougher, tougher trails. Officially licensed Mickey Thompson Baja Pro X tyres mounted to Pro-Line Holcomb Crawler Bead-Loc wheels supply the grip to get through extreme terrain.

The UTB18 Capra 4WS ready-to-run package includes high-quality Spektrum electronics for maximum value. The stand-alone Spektrum Firma 25A brushed ESC and Spektrum 5-channel SR515 dual protocol receiver accommodate additional lighting options and transmitter upgrades. The Spektrum Smart 650mAh 2S LiPo battery powers the rig through 30+ minutes of uninterrupted adventure. Recharge the battery quickly and easily with the supplied Spektrum Smart USB-C charger.
