

THE NO-HASSLES WARBIIRD ALTERNATIVE

A-EFL02650/A-EFL02675 P-51D Mustang 1.0m BNF Basic (AS3X+ & SAFE Select) / PNP

The E-flite P-51D Mustang 1.0m is a "sport scale" replica of the most popular and iconic fighter aircraft ever! Designed from the ground up to be a smaller and more affordable alternative to larger "full-house" P-51 models because not everyone is ready for the complexity of flaps and not all fields are suitable for retractable landing gear. But it's also larger so it's easier to see and can handle flying in more wind than smaller micro and ultra-micro class models - yet can still be flown at large parks and sports fields while being easy to transport without disassembly. This makes it a perfect first-ever low-wing, scale, and warbird model for low-time pilots who have mastered a trainer and no-hassles everyday sport scale model for experienced pilots. The BNF Basic version is equipped with enhanced AS3X+ technology that smooths out the effects of wind and turbulence better than ever before, and is also equipped with optional-use SAFE Select technology that makes it even easier to fly! And both versions include Spektrum digital, metal-gear servos, a 30A telemetry-capable ESC, plus a 3S and 4S compatible motor.

FEATURES

- The best choice for a first-ever and no-hassles everyday warbird for low-time to experienced pilots
- Specially tuned motor compatible with 3S and 4S batteries without the need for modifications or upgrades
- Two-blade prop to offer more speed and efficiency that's less likely to break when belly landing
- Popular 3S and 4S 1300-2200mAh batteries deliver excellent performance and flight times
- 30-amp telemetry-capable ESC provides real-time battery voltage, current, RPM and other data via compatible receivers and transmitters
- Take off from and land on smooth surfaces using the included landing gear plus steerable tail wheel
- One-piece wing with hands-free servo connections that can be installed and removed easily and quickly
- Four factory-installed digital and metal-gear servos for precise and reliable control
- Fast and easy snap plus bolt-together assembly - no glue or special tools required
- Large and convenient top mounted hatch provides easy access to the battery

IN THE BOX

- (1) E-flite P-51D Mustang 1.0m with:
- (1) Spektrum BL Outrunner Motor
- (4) Spektrum Digital, MG Servos
- (1) E-flite 30A Telemetry-Capable Brushless ESC
- (1) Spektrum AR631+ 6-Channel Receiver (BNF Basic Only)
- Instruction Manual

NEEDED TO COMPLETE

- **BNF Basic** - Full-range 4-5+ channel Spektrum DSMX transmitter
- **PNP** - Full-range 4+ channel transmitter and receiver
- (1) 3S 11.1V or 4S 14.8V 1300-2200mAh LiPo with EC3 or IC3 Connector
- (1) Compatible LiPo charger
