

BOOST SLA12

12V Sealed Lead Acid Battery Charger

SPECIFICATIONS

Input	110-240V AC 0.4A
Charge Output	12V
Charge Rate	700mA
Battery Type	Sealed Lead Acid
Recommended Capacity	2-8Ah

CHARGING A BATTERY

1. Plug the charger into a mains power socket and turn the power on.
2. Connect the battery to the charger ensuring correct polarity.
3. The LED will turn Red to indicate it is charging the battery.
The approximate charging time for a fully discharged battery pack can be calculated by:- $Time (Hours) = Battery Capacity (Ah) \times 1.7$
4. When the LED turns green the battery will be fully charged.
5. Disconnect the battery from the charger and turn off the power.
N.B. Do not turn the power off and leave the battery connected.

*This charger is designed to charge Sealed Lead Acid batteries only.
DO NOT charge any other type of battery with this charger.*
